

# COMPLIANCE MANAGER

## KEEP EQUIPMENT CERTIFIED BEFORE YOU NEED IT

With Geoforce Compliance Manager, users can be alerted to the certification and maintenance status of their entire fleet. With the added context of current locations, users can also take immediate actions to ensure their fleet stays compliant and maintained.

- Respond immediately to compliance alerts, with context of asset location
- Reduce downtime waiting for equipment certification
- Audit equipment locations for inventory and liability management
- Enhance SOX compliance and financial accountability
- Reduce risk of third party equipment being out of compliance through unique asset visibility sharing platform
- Maintain and share electronic certifications and compliance documentation
