

TRACK & TRACE
FOR

**POWERED
EQUIPMENT**

Because field operations don't have to be chaotic.

Pumps, generators and light towers are all mission-critical powered equipment used daily in the oilfield. To reduce operational costs for equipment in remote areas, Geoforce provides vital location, run time and maintenance reports.

WHERE'S MY **EQUIPMENT**?

- Locate valuable equipment
- Improve response times
- Plan field operations

WHERE'S MY **RISK**?

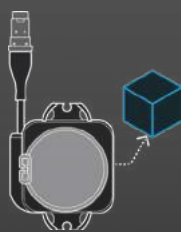

- Reduce downtime on jobs
- Ensure maintenance is current

WHERE'S MY **PROFIT**?

- Turn equipment faster
- Increase asset utilization
- Cut capital expenses

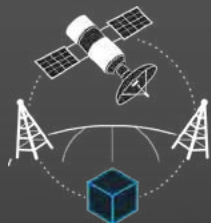

GEOFORCE IN ACTION

INSTALL

Field assets that require tracking are identified and purpose-built devices are installed on each asset.

TRANSMIT

GPS and data are transmitted via global satellite and cellular networks. Secure Tier 1 data centers receive, process and enrich the data, then feed applications.

TRACK

Enriched asset data is viewed via the web and mobile devices, solving key operational challenges.
